FIELD-DRIVEN LEAN PROCESS

Fleming Steel Erectors uses a Field-Driven LEAN Process to streamline what is a notoriously fragmented segment of the construction industry; material and erection of structural steel building solutions typically found in Division 13. General contractors and construction managers can now benefit from our decades of engineering, manufacturing and field experience, while improving the process of integrating structural steel, wall sheeting, and roofing and re-roofing packages into their next construction or retrofit projects. We infuse safety and efficiency into each facet of the process; from estimating and designing, to sub-trade collaboration and sequencing for shipment for projects ranging from 25k-1M square feet and beyond.

STRIKING THE BALANCE BETWEEN ENGINEERING AND FIELD OPERATIONS

With more than 90-years' experience on the building manufacturer side, and over 70-years and 65M+ square feet in field installations, Fleming Steel Erectors is uniquely positioned to eliminate conflicts and finger pointing to keep your Division 13 steel building on deadline and on budget. Our process begins with pre-construction in order to avoid plan interpretations that may negatively impact project outcomes. Our day-one involvement insures the highest quality, while addressing the issues that lead to on-site delays and back-charges.

SAFE, DEPENDABLE & FAST

We have safely assembled millions of square feet across the US, while delivering on accelerated schedules. Our zero harm, behavior-based safety credo dictates all field-work processes and allows us to maintain the highest safety standards throughout each stage of construction.

The results speak for themselves – From 1.1M square feet DC's erected in just 31 days for Wal*Mart back in the 90's, to 300k square feet for Amazon today, executing large material/erect steel packages is in our DNA.

FLEMING STEEL ERECTORS

BUILT FAST. BUILT SAFE. BUILT RIGHT.

This legendary performance put Fleming on the map. 1.1M sq. ft. erected in 31 days. Just one of 45 DC's completed across the US for Wal*Mart in the 1990's and early 2000's.

On this most recent project for Amazon, a client partner since 1999, we were part of the construction team that delivered the entire 300k sq. ft. turnkey in 8 months.

By leveraging our extensive metal building design experience, we were able to optimize the building frame and crane support systems, providing us with both a cost and schedule advantage over 20 other competitors.

FAST

Field-Driven LEAN Process Infuses Speed and Safety into Each Phase of Procurement and Installation.

EXPERIENCED

70-Years Field Experience Combined with Next-Gen Talent. 90-Years Combined Experience Working with and for Manufacturers.

COOPERATIVE

Solid Working Relationships with Most Leading Steel Building Packages. Able to Deliver Upon All Manufacturer Warranties.
