

FEATURED PROJECT

FSE PROVIDES STRUCTURAL STEEL AND ROOFING INSTALLATION FOR JARBOE SALES' 270K SQUARE FOOT DISTRIBUTION CENTER

PROJECT SUMMARY

Category: Distribution

Location: Tulsa, OK

Construction Type: New Construction

Square Feet: 270k

Jarboe Sales has provided quality liquor, wine and beer products to Oklahoma bars, restaurants, hotels and liquor stores since licenses were first issued in the state in 1959. When it was time to consolidate and expand their Tulsa-based operations, Jarboe reached out to the Fleming Construction Group, building upon a construction partnership that dates back to that same year.

To accommodate their expanding footprint and help position them for another 60+ years of success, Fleming Steel provided structural steel erection and roofing for their new 270,000 square foot facility. The building, which strikes the balance between state-of-the-art distribution capability and cost-efficiency, features a highly functional building shell supported by Butler Manufacturing® PEMB structural steel and capped with the Butler MR-24® roofing system.

The project was completed on time and on budget with zero safety incidences.

PROJECT SCOPE

- Butler Structural Steel System
- MR-24 Standing Seam Roof

RESULTS

- Completed On-Time and Under Budget
- Zero Safety Incidents

Our Partners:

“ We are so honored every time a client comes back to do another project with us. It's the ultimate compliment, and the ultimate reward for a job well done. Jarboe Sales has put their trust in us for decades, and we take that honor very seriously. In return, we will continue to do our best to deliver highest quality construction that lasts the test of time. - Justin Willett, FCG President
