Fleming Steel Erectors Achieves AC478 Accreditation

Bethlehem, PA - www.MBCEA.org - The Metal Building Contractors and Erectors Association (MBCEA) announces that Fleming Steel Erectors, headquartered in Tulsa, Oklahoma and providing services throughout the United States, is the first metal building assembler based in Oklahoma to obtain the prestigious AC478 accreditation administered by the International Accreditation Service (IAS). AC478, Accreditation for Metal Building Assemblers Inspection, is a standard to recognize metal building assemblers committed to excellence.

Achieving this accreditation demonstrates that Fleming has the personnel, the organizational skills, vast experience, knowledge, management procedures, and commitment to assemble metal buildings in accordance with code, specifications, costs and deadlines. Requirements for this accreditation include documented management systems, rigorous safety training, quality managers, OSHA training, documented safety plans, site-specific plans, and other documentation.

"With your branding and reputation of '*Taking the "Division" out of Division 13*' underscored by '*ready to deliver the experience...*', we are honored to welcome you to the exclusive group of AC478 Accredited members," says MBCEA President Robert Tiffin. "We look forward to your success and industry contributions. Personally, I am thrilled to learn from you and will look forward to those opportunities."

"To be recognized as an AC478 accredited company is a huge milestone and a reflection of the entire FSE team's professionalism and dedication to their craft. I couldn't be prouder of our team

and their commitment to quality and safety.” -Justin Willett, Fleming Construction Group President.

For more information about the IAS AC478 accreditation program visit mbcea.org. For more information about Fleming Steel Erectors, visit fse-ok.com.

About FSE: Fleming Steel Erectors, a division of the Fleming Construction Group, is a nationwide steel erection services company that partners with general contractors to complete division 13 PEMB, conventional and hybrid steel system erection projects ranging from 25,000 to over 1,500,000 square feet. FSE has decades of experience in both the manufacturing and on-site erection sides of the industry, with more than 120 million square feet of completed installations. For more information visit <https://fse-ok.com/>.

The MBCEA was formed in 1968 to serve the needs and support the interests of metal building contractors and erectors. It has 3 main goals:

- Education: To provide programs and venues that enhance education opportunities for metal building contractors and erectors.
- Image Enhancement: To develop programs to enhance the image of metal building contractors and erectors, and the metal building industry.
- Grassroots Support: To develop and maintain programs specifically designed to support and respond to the needs of the grassroots membership of the MBCEA.

The association proudly boasts membership from virtually every aspect of the industry and all 50 States and Canada. For additional information please visit our website at www.mbcea.org or contact Sasha Demyan at 484-239-3337.
